FOR IMMEDIATE RELEASE

SANITARY SEWER MANHOLE REPAIR WORK ON CLAYSTONE DRIVE AND WALLSTONE DRIVE

Dover, Del. - Kent County Department of Public Works announces that a sanitary sewer manhole repair project is underway in the Fieldstone Village Community in north Dover. This project will address a manhole structure that has settled causing grit to buildup in the manhole and pipes, which is restricting sewer flow. Due to the depth of the manhole, work will occur in phases: a road closure, dewatering well installation, mobilization of equipment, excavation and restoration. George and Lynch Inc. and Shore Services are the contractors on the project.

The depth and location of the manhole requires a closure to thru traffic at Claystone Drive and Wallstone Drive. There will also be a detour at Salt Creek Drive, Platinum Drive and Wallstone Drive. Signs and detour arrows will be installed prior to the dewatering well installation. The pedestrian path between the houses to shopping center will also be closed to pedestrian traffic. The area where the work will occur has been painted out on the road surface at the intersection. Road closures have begun this morning, and excavation work will begin next week. The project is expected to last approximately three weeks.
